### 20 PER CENT DISCOUNT WILL BE ALLOW-ED ON ALL FORMER LOW PRICES

A few old Standard Piano Manufacturing Companies have offered to stand the expense of disposing of all "odds and ends" upon condition that we devote ourselves to their lines exclusively in future. They are willing that their instruments appear in the sale in order to give it the right attractive

Thus, commencing October 31st and until November 15th, or as long as the present stock lasts, all Pianos and Players will be sold at the exceptionally low discount of 20 per cent, with proportionate discount for long time installment contracts for those who want time.

It is needless to say that this is an unusual chance of securing a Piano or Player-Piano at the lowest possible cost.

# THE HARROW TO BUY

HE ECONOMY DISC HARROW acknowledges no equal. There is not another harrow on the market that presents so may valuable features. It is a graceful, neat appearing implement, and at the same time has strength to spare. The frame bars are of high carbon steel, as stiff and hard as can be worked in a blacksmith shop. The discs are heavy, with long, sharp bevel, and nicely polished. The spools have a large face that acts as a brace for center of disc and prevents breakage in rough work. The harrow has great flexibility and readily adapts itself to uneven ground. One section may override obstructions or dip into dead furrows without affecting the work of the other section. The gangs cut a uniform depth their entire length. The bearings are of hard maple, with

side bearings an equal amount of end thrust. By using this device it is unnecessary to have any contact between the inner ends of disc gangs, thus insuring greater flexibility, less friction and lighter draft. The scrapers are the most satisfactory to be found on any disc harrow. The openings in the brackets are so shaped as to admit of the scraper bar being rocked back and forth with the foot levers, thus forcing the blades to sweep the entire face of the discs from center to edge. The scraper is

always held firmly against the face of the disc. The Economy Disc Harrow is also made with double lever, and where such an implement is in demand it finds no superior. Having independent levers, each gang can be set at any desired angle independently of the other.
